

Polyester fiber filter

Model:SV-1020A

In-ground filter are made of fiberglass and polyvinylchloride, which reasonable design and good-looking and durable. The in-ground does not need a machine house, which save construction cost, convenient operation and save maintenance cost. Multic use in-ground polyester filtering capacity. According with swimming pool specifications and standards.

Notes: Ozone and heater (optional)

Technical characteristics

Power	1.5HP/220V
Filter type	Polyester fiber 2*75ftz
Flow rate	25m ³ /h
External Dimension	990*800*1020mm
Disinfection	Sterilizer (optional)
Salt chlorinator	50g/h (optional)

SV-1020A

Injector nozzle

Underwater light

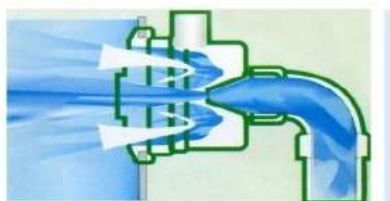

Filter bag

Leaf basket

Product Introduce
the most high performance pool filter equipment.

- Low Cost: No need of machine room, sand pool & pipeline and save water;
- High performance: High density filter with Turbo Direct Injection;
- Ease Use: Easy installation, convenient operation and no leakage of water;
- Pretty appearance: Stainless pool lamps and ladders.

TDI illustrate of SP-1450T
Filter Time: Auto set
Filter Area: 0.3 m²
Size: 990 x 1020 x 800mm
Weigh: 80Kg
Material: High-class material from U.S.A.

Power: 0.9Kw/220V, 1.13Kw/220V
Pool Lamp: Stainless halogen lamp 100W/12V
Spout: Turbo Direct Injection SPA spout
Flow Ratio: 20 m³/H, 25 m³/H
Pressure: 220V/50HZ
Filter Precision: ≤ 5 μ
