GENKINNO P2

Seamless Cleaning, From Top to Bottom

Designed to deliver unparalleled cleaning result, the Genkinno P2's innovative new design leverages intelligence built into its very core. As a result, the vacuuming suction of pool floors will remain constant, regardless of the level of debris in the cleaner, while the pool's surface is skimmed clean with the revolutionary skimmer accessory.

Tech Specs

P2 Robotic Pool Cleaner

Dimension (L×W×H) 415×276×200 mm 16.3×10.9×7.9 in	Weight 4.6 kg/ 10.1 lbs	Max. Water Depth 2.7 m/ 9 ft
Max. Pool Size 100 m ² / 1076 ft ²	Max. Slope Angle 15°	Filter Basket Size 2.4 L/ 0.6 gal
Filter Fineness 147 μm	Max. Run Time 120 min	Battery Size 9000 mah
Cleaning Area Pool Floor	Cleaning Mode Automatic/ Manual	

Panaromic Skimmer

Dimension (L×W×H) 473×310×141 mm 18.6×12.2×5.6 in	Weight 950 g/ 2.1 lbs	Max. Pool Size 100 m ² / 1076 ft ²
Filter Basket Size 2 L/ 0.5 gal	Filter Fineness 147 μm	Cleaning Area Water Surface

Superior Cleaning

Every aspect of the P2's design was focused around maximizing cleaning efficiency.

Hydrodynamic flow design: ensures the optimal flow of water through the device to prevent clogging and maximize suction.

Water-driven propulsion: power consumption is focused entirely on suction, propelling the device forward while removing debris.

AdaptiveSuc Technology: maximizes vacuuming efficiency by increasing suction power when encountering slopes or large debris.

Brushless motor: 2-3 times more energy efficient suction power, and offers a longer life cycle compared to traditional brushed motors.

Controlled Cleaning

The Genkinno app offers personalized tracking and monitoring of pool cleanliness, as well as manual control for added flexibility and convenience.

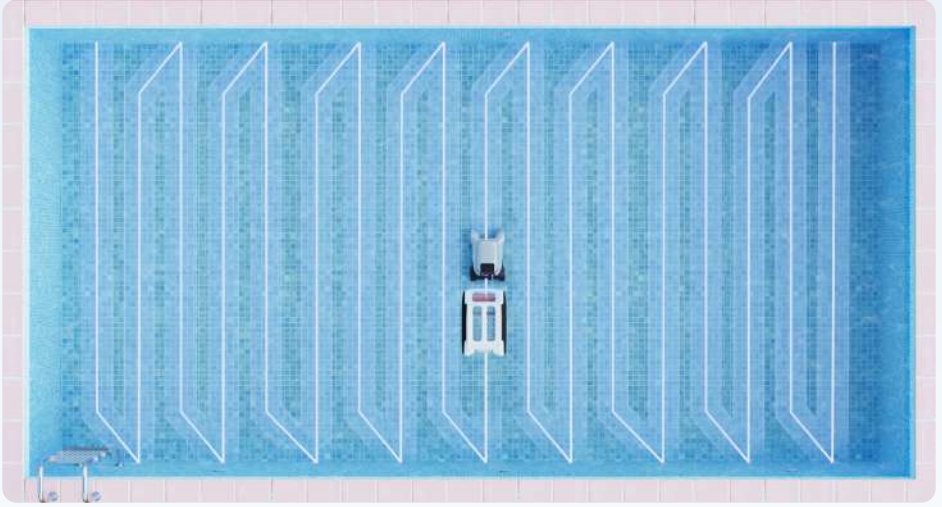

Smart app: monitoring, cleaning control, OTA firmware updates.

Remote control: suction power adjustment, spot cleaning.

Hassle-Free Vacuuming

We've upgraded our path planning technology to further ensure a comprehensive cleaning result across all different pool types. With AdaptiveNav, no area is left untouched.

Path planning baseline: gyroscope and magnetometer hardware allied to intelligent algorithms ensure precise navigation.

AdaptiveNav: dedicated algorithms targeting specific pool shapes including rectangular, round/oval, kidney, and more.

Wall detection: minimizing the spread of debris caused by underwater momentum.

Effortless Automation

A standalone, user-friendly, and plug-and-play solution that works independently without the need for extra equipment or dependence on existing filters, featuring poolside parking for simple retrieval.

Enjoy up to 120 minutes of runtime per charge.

Floating cable removes the need for a retrieval hook.

Lightweight handheld design. No caddy required.

Silicone tires to improve grip and maneuverability.

Surface Skimming Capability

Attachable skimmer module that provides a cost-effective method to remove debris- including hair, leaves, insect carcasses, and more- floating on the water's surface.

Triple-side design: for more comprehensive skimming over a greater surface area.

Full coverage: follows P2's advanced path planning to ensure coverage across the entire pool.

Interchangeable magnetic connection: designed to support a wide range of future accessories.

Future-Proofed Performance

P2 is an exceptional pool cleaner that's simply built to last, renowned for its unmatched quality, comprehensive cleaning capabilities, and unwavering durability.

Antioxidant shell: color retains its vibrancy over time.

Certifications: FCC, CE, RCM, MSDS, AIG Insurance, and more.

Local Logistic and Support: Warehouses and repair centers in the USA, Germany, and Australia, with 24-hour email response.

Our passion lies in redefining the future of pool cleaning

At the forefront of pool maintenance innovation, our team of engineers and product developers combines top-notch performance with relentless innovation, delivering responsible solutions that transform the way you clean and care for your pool.
