

CFAT SALT CHLORINATOR

"A happy moment with a clean and clear swimming pool."

CFAT Salt Chlorinator

- ✓ Industry-Leading Titanium Plates
- ✓ Cell Plate made by US Manufacturer
- ✓ Extended-Life Self Cleaning Cell
- ✓ Providing a Safe and Luxurious Swimming Pool Experience

CFAT Salt Chlorinator

The MONA CFAT salt chlorine generator, by electrolysis, creates chlorine to sanitize your pool from the salt molecules (NaCl) in your water. A small electric charge is applied across a set of titanium plates inside the Electrolytic Cell. This produces Sodium Hypochlorite (NaOCl). In water, Sodium Hypochlorite dissociates into sodium (NA+) and hypochlorite (OCl-) ions. It is the hypochlorite ions that form with the hydrogen (H+) ions (from the water) to form hypochlorous acid (HOCl), which is the active agent that destroys bacteria and algae and oxidizes organic matter. This form of chlorine works quickly in the pipe, leaving only a mild residual in the pool. In addition, the Electrolytic Cell continuously “shocks” the incoming water- burning off any oils, organic matter, or other particles that need to be oxidized.

FEATURES:

- ✓ Water flow detector with external and internal flow-switch.
The internal flow-switch of CFAT already included in the cell.
- ✓ Long life time cell 10,000-15,000 hours
- ✓ Digital display, easy to use control system
- ✓ Accurate salinity level reading
- ✓ Adjustable chlorine output
- ✓ Super chlorination mode and Winter Mode
- ✓ High & low salt indicators & protection (working salt from 2300 to 6500PPM, and Ideal 3000 to 4000PPM)
- ✓ High & low temperature indicators & protection (working temperature from 10°C to 60°C)
- ✓ Cell failed indicator
- ✓ Reverse polarity/Self Cleaning. The Electrolytic Cell has a self-cleaning feature incorporated into the electronic control's logic.
- ✓ Smart Chlorinator Program. Available with time clock and pump control.
- ✓ Warranty 2 years

CONVENIENCE CONTROL KEYPAD

The easy to use Keypad to enables complete control of sanitizer system. CFAT Salt Chlorinator continually generates chlorine at level your require. Set and Forget.

With SUPER CL Mode and WINTER Mode make your more convenience to boost chlorine output to maximum power for 24 hours or reduce chlorine setting by half as your pool environment.

SPECIFICATION

Model	Chlorine Output / hr.	Pool Volume (Litres)	Power	Consumption
CFAT20G	20 gm/hr.	80,000	220V/50HZ	80W
CFAT30G	30 gm/hr.	120,000	220V/50HZ	120W
CFAT40G	40 gm/hr.	160,000	220V/50HZ	140W
CFAT60G	60 gm/hr.	200,000	220V/50HZ	140W
